### **\*DNA Sequencing Kits**

**AccuPower®** DNA Sequencing Kit is a premix-type product, which contains all reagents for DNA sequencing lyophilized in one tube so the DNA sequence can be analyzed rapidly and accurately. The best sequencing results can be obtained since band intensity background is minimized by using sequencing grade Top™ DNA polymerase, of which 5'→3' exonuclease activity is deactivated.

**K-1010-1 AccuPower DNA Sequencing Kit 0.2 ml thin-wall 8-strip tubes – 203 EUR**

**K-1010 AccuPower DNA Sequencing Kit 0.5 ml tubes – 203 EUR**

**Top™** DNA Sequencing kit contains all reagents for DNA sequencing. DNA sequence can be analyzed rapidly and safely by silver staining.

The best sequencing results can be obtained since band intensity background is minimized by using sequencing grade Top™ DNA polymerase, of which 5' → 3' exonuclease activity is deactivated

**K-1020 Top™ DNA Sequencing Kit -Solution Type 0.2 ml thin-wall 8-strip tubes (100 reactions) – 253 EUR**

**K-1020-1 Top™ DNA Sequencing Kit -Solution Type 0.2 ml thin-wall 8-strip tubes (500 Reactions) – 637 EUR**

**Silverstar™** kit is designed to increase DNA detection sensitivity over 20-fold by using an enhancing solution, compared to conventional silver staining systems. Silverstar™ Staining kit enables detection of minute amounts of DNA (1 pg DNA/mm<sup>2</sup> band cross-selection) due to the enhancing solution, and can be applied to various analyses such as DDRT, SSCP, VNTR, and RAPD, as well as DNA sequencing gel.

**K-1050 SilverStar® Staining Kit 20 assays – 300 EUR**
