

Neptune Barrier Tips

Protect your work from contamination with one of the industry's most efficient aerosol filter assemblies. Our proven range of filter tips reliably prevent aerosol transfer to give you complete peace of mind when performing your most sensitive assays.

The exclusive S3 polymer was designed to increase pipetting accuracy by virtually eliminating tip retention and sample hold-up. S3 pipette tips deliver volumes within 0.1% of the indicated volume, versus 0.7% for standard polymer tips. This provides a more accurate application.

OrPlate culture plates

- Made of USP VI class virgin Polystyrene, high clarity and toughness, high light transferability with minimal light distortion
- Guaranteed even surface refinement in the growth zone
- Alpha-numeric identification method to identify each well
- Specially designed lid separates each well, thus preventing liquid or condensate cross-contamination
- Deep spacing between the wells to prevent cross-contamination
- Cut corner makes the lid a "one-way" lid
- Special design allows easy and stable stacking
- Optimum optical clarity for microscope observation
- Packaged in easy to peel paper back and plastic packs
- Test Plates are certified as having been sterilised by gamma radiation
- Test plates are certified as being DNA and RNA free
- Test plates are certified as having an endotoxin level of <0.5 EU/ml
